MULTI-TOUCH OVERLAY

- Simple add-on solution allowing transform any monitor or TV into multi-
  touch enabled device
- Small&Light construction – aluminum frame 9,6mm x 21mm (cross
  section), foldable
- Simple installation – just attach the frame (no calibration needed) and plug
  one USB cable. (for Operating Systems natively supporting touch control)
- Simple usage – touch frame does not require any other components
  nor extra glass reflection surface (nevertheless, a glass protection is
  recommended as it minimizes possibility to harm the surface of monitor/
  TV, e.g. with fingers, nails…)
- All main Operating Systems supported - Windows 8, 7, Vista, XP, Linux,
  Android, MAC OS....
- Some Operating Systems do not require any additional drivers and work
  immediately upon connection of USB (e.g. Win 8)
- Located touch precision +/- 2mm
- HW resolution 4096 x 4096 points
- Touch system is full-angle solar immune
- Touch system protected by 70 patents !
- Basic model: Up to 4-touch support
  Available sizes 32" – 82" (full range 17"-110")
  Connection provided via single USB 2.0 cable
- Advanced model can support up to 32 touches simultaneously
- Touch wall model can cover installations up to 2m x 10m
- Very affordable price
